

Indicators to the Convention of the Rights of the Child in West and Central Africa

Table with 29 columns for various indicators and 51 rows for countries and regions. Columns include population, birth rates, literacy, and violence. Rows list countries like Benin, Burkina Faso, Cameroon, etc., and regional aggregates.

GDP per capita: Gross domestic product (GDP) is the sum of value added by all resident producers plus any product taxes (less subsidies) not included in the ation of output. GDP per capita is gross domestic product divided by midyear population. Growth is calculated from constant price GDP data in local currency.

Child labour: Percentage of children aged 5-14 involved in child labour at the moment of the survey. A child is considered to be involved in child labour under the following conditions: (a) children 5-11 years of age who, during the week preceding the survey, did at least one hour of economic activity or at least 28 hours of domestic work and (b) children 12-14 years of age who, during the week preceding the survey, did at least 14 hours of economic activity or at least 28 hours of domestic work.

Colors definition: Blue: Baseline used to compare the performance of each country OR if country data is equal to the regional baseline; Green: Country data is better than the regional baseline; Red: Country data is worse than the regional baseline.
